ABOUT US

Tumisang Tsitsi Security Systems, a division of Tumisang Tsitsi Legacy Holdings (Pty) Ltd, is a trusted North West-based provider of cutting-edge electronic security solutions. Strategically located in the heart of South Africa's platinum belt, we specialize in designing, supplying, and installing robust perimeter protection systems tailored for mining, industrial, commercial, and institutional clients.

Our mission is to safeguard our clients' people, assets, and operations through reliable, technology-driven security systems. From civil works and camera installation to full Security Operations Centre (SOC) integration, we deliver end-to-end solutions built on quality, precision, and a deep understanding of local security challenges.

GROUP

OUR SERVICES

Perimeter Protection & Surveillance Systems

- **Strategic Camera Deployment:** Supply and installation of high-definition fixed and thermal IP cameras for 24/7 monitoring of your perimeter.
- **Internal Security:** Installation of vandal-resistant dome cameras within critical internal areas like server and NVR rooms.
- **Supporting Infrastructure:** Turnkey supply and installation of camera poles, including all required civil works and concrete foundations.

Power, Protection & Network Infrastructure

- **Equipment Safeguarding:** Installation of comprehensive surge protection and proper earthing for all electronic equipment.
- **Lightning Protection:** Provision of lightning protection for all poles and cameras to safeguard your investment.
- **Network Backbone:** Installation of fiber and copper network cabling to form a reliable backbone for your security system.
- **Core Hardware:** Supply and installation of essential network hardware, including switches and Network Video Recorders (NVRs).

Security Operations Centre (SOC) Integration

- **Secure Connectivity:** Provision of reliable wireless network links to connect remote sites directly to your central SOC.
- **Platform Integration & Configuration:** Seamless integration with existing SOC platforms and infrastructure. We handle all system configuration, including user permissions and camera views.
- **24/7 Monitoring Enablement:** We engineer our solutions specifically to deliver real-time event detection and response functionality for round-the-clock security monitoring.

Video Analytics & Intelligent Alarm Management

- **Proactive Monitoring:** Configuration of basic video analytics for perimeter protection, including motion detection, virtual line crossing, and intrusion detection.
- **Instant Alerts:** Integration of alarm and event notifications into the SOC system to ensure critical alerts are acted upon immediately.

Testing, Commissioning & Support

- **End-to-End Validation:** Full system testing, optimization, and commissioning prior to handover to ensure flawless performance.
- **Operator Training & Documentation:** Comprehensive orientation for system operators and provision of detailed handover documentation for a smooth transition.

OUR PRODUCT SOLUTIONS

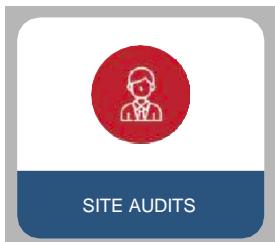

Tumisang Tsitsi Security Systems solutions provide the means to protect properties, employees, and assets by installing quality products and implementing security measures throughout the business.

Tumisang Tsitsi Security System solutions are tailored to meet the requirements of any size business, enabling businesses to improve security and mitigate risk. We provide advanced, intelligent product combinations that are reliable and efficient, in addition to simplifying the daily system management for users and operators.

OTHER SOLUTIONS

Tumisang Tsitsi Security Systems prides our success on the array of quality services and solutions which we offer our partners and their customers. All projects are commissioned to experts and, once installed and handed over, the quality of our equipment and its associated performance ensures that all parties involved can enjoy the ongoing peace of mind of a successful and suitable solution.

OUR SUPPORT

Tumisang Tsitsi Security Systems goes beyond selling products by offering exceptional technical support and investing in customer development. We provide regular in-person technical training opportunities for registered customers, which includes bi-weekly full-day sessions covering relevant Hikvision products and technical topics. Tumisang Tsitsi Security Systems is a commissioned provider of the official Hikvision Certified Security Associate (HCSA) training program. This robust training program ensures customers possess the expertise to effectively utilise Hikvision solutions.

OUR COMMITMENT

At Tumisang Tsitsi Security Systems, our relationship with our clients does not end at handover. We are committed to being your long-term partner in security. We understand that security needs evolve, and technology advances. Therefore, we design every system with **scalability and future growth** in mind.

Our team stays at the forefront of security technology, ensuring that the solutions we provide today can seamlessly integrate with the innovations of tomorrow. We are dedicated to ensuring your security infrastructure remains effective, relevant, and robust for years to come, protecting your investment and your people.

We don't just install systems; we build lasting security partnerships.
